The Dietary Guidelines for Americans recommend limiting saturated fat to 20 grams and sodium to 2,300 milligrams for a typical adult eating 2,000 calories daily. Recommended limits may be higher or lower depending upon daily calorie consumption.

The nutritional information in this guide is derived from testing conducted in accredited laboratories, published resources including those from the U.S. Department of Agriculture, analyses using standard industry software and from information provided by our suppliers. All nutritional information is based on average values for ingredients from our suppliers throughout the U.S. and is rounded to the nearest whole number to meet current U.S. F.D.A. N.L.E.A. guidelines. The information given is based on standard recipes and serving sizes and BJ's Restaurants cannot guarantee that the information provided is completely accurate as it relates to the prepared menu items at each restaurant. Variations in serving sizes, preparation techniques, product testing and sources of supply, as well as regional and seasonal differences in ingredients, may affect the nutritional values for each menu item. In addition, product formulations change periodically and sometimes substitution of ingredients is required. You should expect some variation in the nutrient content of the products purchased in our restaurant, particularly if an order is customized. This information was updated as of April 2025.
